

Andrew Cormack, JANET(UK)

Andrew Cormack is JANET(UK)'s Chief Regulatory Adviser, responsible for advising the company and the network's customers of policy, regulatory and security issues that may arise from new uses of the network. He also works on raising awareness of these issues internationally, through membership of TERENA's Technical Committee and Committee on Advanced Middleware and of the Permanent Stakeholders' Group of the European Network and Information Security Agency (ENISA). He has degrees in Mathematics from Cambridge University and Law from the Open University, and is a European Chartered Engineer.
