

JANET Roaming Service Members Joining Pack

Thank you for registering with JANET Roaming, we hope you will be soon able to offer an operational eduroam service at your organisation, whether Home (IdP) or a Visited (SP). The JANET Roaming website www.ja.net/roaming contains a host of information to help you implement and maintain your eduroam service.

Induction to the JANET Roaming Service

If you have not already been through the telephone induction to JRS, one of our technical advisors will be in contact shortly to arrange a telephone conference explain the support infrastructure we have, advise on eduroam implementation and guide you through the JRS Support Server.

The JRS Support site is how you not only inform us of the details of your RADIUS servers (thus enabling the support to generate the shared secrets required to allow your RADIUS servers to peer with the NRPS,) but also provides remote and local testing functions, monitoring of your service and it enables you to assert the operational details of your service.
